

While serving you in this hotel, where you can spend quality time with your family and create beautiful memories, we do not overlook our responsibility to protect nature. Our sole purpose is to implement our environmental policy, adopted out of respect for the environment and the rights of all living beings, within the framework of current laws and practices, and most importantly, with your support.

The following points are continuously updated to meet today's requirements and needs, adhering fully to environmental sustainability principles to minimize environmental impacts, without ever straying from the goal:

- We will minimize pollution and harm to the environment by controlling factors that may cause environmental pollution.
- By focusing on continuous improvement in energy efficiency, we commit to reducing energy usage in our hotel and utilizing renewable energy sources.
- We strive to use water, energy, and all natural resources efficiently. We share this sensitivity with our employees, guests, and suppliers.
- We measure our performance in environmental management, monitor these metrics against objectives, and strive to improve our performance.
- We aim to educate our employees on environmental matters and increase their awareness.
- We target minimizing waste production and promoting recycling. We review waste management processes, develop strategies to reduce waste, and take measures to prevent waste from harming nature.
- We adopt water-saving policies to conserve water resources, optimize water usage, prevent leaks, and apply water-saving technologies.
- By offering eco-friendly options to our guests and employees, we aim to raise environmental awareness. We prefer environmentally friendly products from our suppliers and encourage sustainability-supporting practices.
- We continue our commitment to protecting natural areas surrounding our hotel and supporting sustainable tourism. We use natural resources sustainably without harming local ecosystems.
- We train and raise awareness among our employees on environmental matters. By encouraging their participation, we work together to achieve environmental goals and foster a culture of environmental sustainability within our hotel.

One of the most crucial steps in sustainability is ensuring energy efficiency. Energy usage must first be measured to identify issues and determine potential savings areas. Equipment and systems with low consumption should be preferred. Long-term improvement should be achieved using automation management and monitoring resources. Energy savings should be continuously analyzed through maintenance, supervision, and monitoring. We use energy efficiently and set goals to reduce energy consumption to protect our world from potential dangers.

As Faik Pasha Hotel Istanbul, we are aware of the negative consequences of depleting energy resources, global warming, and the harm caused by fossil fuels to the environment. We have opted for renewable energy sources and made efforts to reduce our carbon footprint.

Environmental Elements Planned to Be Achieved Within the Scope of Sustainability at Faik Pasha Hotel Istanbul:

- Researching suitable efforts to increase the use of solar energy.
- Continuously including training in the annual plan to raise awareness among our staff about reducing energy and water consumption rates.
- Acquiring eco-friendly and energy-efficient machinery, equipment, and consumables, and ensuring their continuity.
- Incorporating renewable energy sources into new investment and renovation activities within the facility.
- Ensuring effective waste management and education to reduce waste, prevent recyclable waste from mixing with household waste, and achieve zero waste awareness.
