Revision No. : 00

Revision Date:

As Faik Pasha Hotel Istanbul, we adopt a safety sustainability policy based on the principles outlined below, aiming to prioritize the safety of our guests and employees while responding effectively to incidents:

- We take necessary safety measures in our workplaces to ensure the safety of employees and guests. We organize regular training and drills on emergency exits, fire safety, and emergency equipment.
- We provide regular safety training to our employees. Awareness and training programs are organized on topics such as incident response, fire safety, and first aid.
- We prioritize using safe materials in the construction and maintenance of our hotel. Regular inspections are conducted regarding building safety and structural durability, and necessary updates are made.
- We ensure security throughout the facility by effectively utilizing security systems. Systems such as camera surveillance, closed-circuit televisions, and access controls are continuously monitored and updated.
- We prioritize the safety of our guests. Security measures are enhanced within and around the hotel to provide a safe accommodation experience for our guests.
- Emergency plans are created to ensure the safe evacuation of employees and guests. We aim for quick and effective intervention in emergencies.
